

**TELEFUNKEN**  
RACOMS

## **Environmental Responsibility**

TELEFUNKEN Racoms conduct their activities with sensitivity to issues having safety and environmental implications.

The purpose of this procedure is to outline the policy, consistent with applicable laws and regulations, for taking all possible measures to prevent damage to persons, property and the environment.

### **Environmental Compliance**

As part of overall Company policy, we are committed to environmental, health and safety standards in all aspects of our operations.

We also conduct a number of measures on an ongoing basis to promote environmentally friendly operational practices, including measures to reduce electrical, gasoline and water consumption.

### **The guidelines of our company for environmental protection are:**

- ◆ Comply with applicable laws and regulations.
- ◆ Incorporation of customer requirements for safety in our products
- ◆ Integrate environmental and safety issues within overall activity goals, at all applicable levels.
- ◆ Continual improvements are aimed for and implemented
- ◆ Take into consideration environmental issues relating to the development and production processes.
- ◆ Employees are instructed accordingly
- ◆ Attain required authorizations, as applicable.
- ◆ Establish open communication channels among relevant units.
- ◆ Establish an appropriate workspace environment for the employees.
- ◆ Encourage employees to report risks and violations
- ◆ Establishment of an emergency team
- ◆ Act towards preventing environmental pollution (air, water, soil, etc.).
- ◆ Commit to the principle of sustainable development by recognizing natural resources as a public resource.
